

Project Overview

We propose the development of a comprehensive Inventory & Sales Management System designed to streamline the management of products, stock levels, suppliers, retailers, sales, and financial transactions. This system will optimize day-to-day operations, improve reporting accuracy, and enhance business efficiency.

Core Features

User Authentication

- **Login:** Secure login via username and password.

User Profile Management

- Users can create and manage their profiles.
- Roles Management: Admin and Staff roles (optional assignment).

Dashboard

- Quick overview of business health.
- Recent activity logs for transparency.

Product Management

- Add, edit, or delete products (name, category, description, price, quantity).

Inventory Tracking

- Add or remove stock manually.
- Maintain a detailed stock-in/out history for every product.

Suppliers/Vendors Management

- Add and edit supplier details.
- View supplier credit, balance, and dues.
- Track pending orders and purchase history.
- Link purchases to stock updates.

Purchase Orders

- Create and manage purchase orders.
- Enter supplier and product details with pricing and payment types.
- Record payments and adjust balances.
- Order status options: Pending, Clear, Hold, Rejected.

Retailer Management

- Manage retailer details.
- Show balances, credits, dues.
- Track pending retailer orders.
- Record sales and special purchase transactions.
- Differentiate retailer types (Priority Retailers for special reporting).

Sales Orders

- Create sales and generate invoices.
- Deduct stock automatically upon sales entry.
- Consolidate multiple bills under a single invoice.

Reporting & Analytics

- **Stock Summary Report:** Up-to-date stock status.
- **Credit Reports:** Bank balance and Hand Cash (adjustable).
- **Due Reports:** Comprehensive due listing.
- **Purchase Reports:** History of all purchases.
- **Order Reports:** Sales and order history.
- **Daily Reports:** All reports shown.
- **Expense Reports:** Expenses categorized by type.
- **Employee Salary Management:** Salary history, dues/advances, and salary payment management.
- **Extra Income Records:** Add and track additional income sources (Income Type).

Exchange Management

- Manage nearby shop transactions (cash and product exchange).
- Track product sourcing and selling separately.
